Calista. Luxury outdoor living, only smarter

Imagine an outdoor space designed with attention to detail. An extension of your living space, where luxury and comfort merge into an oasis of tranquillity. That is Calista.

With its sleek design, latest technologies and seamless finish, this modern canopy allows you to enjoy your terrace and garden in style. Seek shelter from the sun, create a cosy spot for those long summer evenings or add an elegant statement to your garden. With Calista, you bring the best of indoors to the outdoors.

The possibilities are endless. From colour and material choices to handy tools and accessories. Every detail is tailored to your wishes, to make your visual showpiece impress from the outset.

What makes Calista unique?

1 SLEEK AND MODERN FLAT ROOF

With sleek lines and a refined finish, Calista's flat roof adds a modern and elegant touch to your outdoor space. It's well-conceived structure allows for large spans, giving you an open and spacious feel with no need for additional posts. Featuring clear glass or stylish sandwich panels, the roof creates a bright and atmospheric setting.

2 INVISIBLE TECHNOLOGY

It's what you don't see that makes the difference. Calista is built with smart technologies that remain hidden but can certainly be felt. Everything is designed to be strong and reliable without compromising on style. The design offers stability and durability, even under severe weather conditions. The electrical features are fully integrated yet remain easily accessible.

3 EASE OF MAINTENANCE

Calista is designed to make your outdoor space as low-maintenance as possible. You can easily remove leaves from above with the convenient leaf filter, while the drainage pipe can be quickly disconnected for rapid cleaning. Even the integrated electronics are accessible, to ensure minimal maintenance and give you more time to enjoy your patio.

4 QUICK INSTALLATION

Calista is carefully prepared and delivered to measure, to ensure fast and efficient installation. Preassembly ensures that the posts, crown beams and other components come with all the necessary extras, such as lighting and glass profiles. The result? A smooth installation process.

5 SEAMLESS INTEGRATION OF ACCESSORIES

5.1 KOZMA DECORATIVE WALL

Add warmth and style to your outdoor space with the Kozma wall system. The wooden panels, made from durable Thermowood Fraké, have a natural look about them. They also have practical benefits: they provide insulation and are lightweight and resistant to mould and insects. Combine the wood with glass or other materials to add character to your patio roof. Be inspired by the different configurations on the next page.

5.2 VERTICAL OR HORIZONTAL SUNBLINDS

Calista's screens add a touch of style while making your outdoor space even more comfortable. The vertical sunblinds protect against wind and insects. They are always perfectly tensioned thanks to the innovative ZIP system. The horizontal roof sunblinds help keep the temperature pleasant under the glass roof, even on hot days. You can choose from a wide range of fabric colours and different levels of light transmission. You can also select how to control the screens: by smart phone, remote control or sensors.

5.3 LED SPOTLIGHTS OR STRIPS

Looking to add extra ambiance to your patio? Go for high-quality LED strips or spotlights, which are available in warm and cool lighting. The lighting is fully integrated into the patio roof, all wiring hidden from view. An elegant addition for an atmospheric outdoor space.

5.4 SLIDING GLASS WALL

With the Climaglide sliding glass wall, enjoy your outdoors all year round whatever the weather. This stylish wall provides protection from the wind and rain and always gives an open view of your surroundings. Thanks to the smart carrier system, the glass panels glide smoothly in both directions to allow easy opening and closing. The sliding glass wall is finished in aluminium profiles in any RAL colour of your choice.

Even more comfort required? Combine the sliding glass wall with a vertical sunblind.

Skylux: Belgian top quality With attention to detail and to you

As a Belgian family business, Skylux has spent three generations bringing natural daylight into the home through flat roofs, as well as creating high-quality outdoor living solutions. Our core values are innovation, sustainability and craftsmanship. Belgian technology is in our DNA.

Our family story in a nutshell:

- Active across Europe
- More than 300 dedicated employees
- A network of carefully selected installers
- Over 50 years of experience
- High-quality Belgian production

Quality and flexibility

Calista combines customisation with a high standard of quality to transform every outdoor space into a unique paradise. Every detail is executed with precision in our processing centre, ensuring your patio meets the highest standards. For a flawless finish, we use our own unique powder-coating line. This offers endless possibilities in colour and finish, and is also sustainable.
